ISO 9001 Certification Renewal for the Metropolis Works Conversion Plant

ConverDyn is pleased to announce the successful completion of an audit by BSI (British Standards Institution) regarding compliance of the Metropolis Works conversion plant with the standards and procedures for renewal of ISO 9001-2008 certification. ISO 9001 certification verifies commitment to quality processes which ensure products continually meet or exceed customer requirements. The recertification is valid for a period of 3 years.

The audit areas included:

- Operations Procedures / Upgrades
- Laboratory Processes
- Maintenance & Reliability Processes
- Uranium Ore Concentrate Sampling / Blending Processes
- Supply Chain Processes
- UF₆ Cylinder Quality Assurance / Storage

The following areas: training, operating procedures, laboratory processes and UF₆ cylinder quality assurance were identified as incorporating best practices.

As previously reported the Metropolis Works conversion plant achieved recertification to Responsible Care 14001 standards in March 2012. This is used by the U.S. chemical industry to demonstrate commitment to health, safety, environment, and security.
